Gevo to Report First Quarter 2022 Financial Results on May 09, 2022

ENGLEWOOD, Colorado – April 21, 2022 – Gevo, Inc. (NASDAQ: GEVO)

announced today that it will host a conference call on Monday, May 09, 2022, at 4:30 p.m. EDT (2:30 p.m. MDT) to report its financial results for the first quarter ended March 31, 2022 and provide an update on recent corporate highlights.

To participate in the conference call, please dial 1 (833) 729-4776 (inside the U.S.) or 1 (830) 213-7701 (outside the U.S.) and reference the access code 2251249# or through the event weblink: <https://edge.media-server.com/mmc/p/rkzfqmut>

A replay of the call and webcast will be available two hours after the conference call ends on May 09, 2022. To access the replay, please dial 1 (855) 859-2056 (inside the U.S.) or 1 (404) 537-3406 (outside the U.S.) and reference the access code 2251249#. The archived webcast will be available in the Investor Relations section of Gevo's website at www.gevo.com.

About Gevo

Gevo's mission is to transform renewable energy and carbon into energy-dense liquid hydrocarbons. These liquid hydrocarbons can be used for drop-in transportation fuels such as gasoline, jet fuel and diesel fuel, that when burned have the potential to yield net-zero greenhouse gas emissions when measured across the full life cycle of the products. Gevo uses low-carbon renewable resource-based carbohydrates as raw materials, and is in an advanced state of developing renewable electricity and renewable natural gas for use in production processes, resulting in low-carbon fuels with substantially reduced carbon intensity (the level of greenhouse gas emissions compared to standard petroleum fossil-based fuels across their life cycle). Gevo's products perform as well or better than traditional fossil-based fuels in infrastructure and engines, but with substantially reduced greenhouse gas emissions. In addition to addressing the problems of fuels, Gevo's technology also enables certain plastics, such

as polyester, to be made with more sustainable ingredients. Gevo's ability to penetrate the growing low-carbon fuels market depends on the price of oil and the value of abating carbon emissions that would otherwise increase greenhouse gas emissions. Gevo believes that its proven, patented technology enabling the use of a variety of low-carbon sustainable feedstocks to produce price-competitive low-carbon products such as gasoline components, jet fuel and diesel fuel yields the potential to generate project and corporate returns that justify the build-out of a multi-billion-dollar business.

Gevo believes that the Argonne National Laboratory GREET model is the best available standard of scientific-based measurement for life cycle inventory or LCI.
